Flexi H-Frame Kits

Our H-frame kits offer the installer full flexibility by providing a solution where they can supply their own strut to suit their installation requirements. The H-frame kits are supplied with a pair of either our 320mm feet, most widely used in the majority of installations or where heavier more demanding loads are present, then our 500mm foot version kit is available. All kits are supplied with hot dip galvanised angle brackets together with all the necessary fixings to assist the installer in a low cost, versatile and fast assembly solution on site. Complete strut assembled frameworks, (H-frame kits where the strut is also supplied), are available upon request.

Typical Installation

What's in the box

Part Code - F-HF-320 (shown above)

Code	Description	Foot Size	Safe Working Load**	Weight
F-HF-320	Flexi H-Frame Kit - 2 square black feet with fittings*	320mm x 320mm	250kg	4kg
F-HF-500	Flexi H-Frame Kit - 2 square black feet with fittings*	500mm x 500mm	600kg	13kg

Specification Extract

Duct/pipe/tray services will be supported on flexi everyday H-frame kits utilising (add required foot size) and with adhered rubber mats. Contact Pump House: Tel: +44(0)115 900 5858

Application

Suitable for everyday installation of ductwork including associated attenuators. Small to medium sized flow and return pipework and electrical containment e.g. cable trays or cable ladders.

Material Specification

- Foot - 320mm & 500mm square UV stabilised 90% polypropylene, 10% grp
- Mat - 100% natural rubber, (mat is adhered to the feet)
- Fixings - M10 ZP sets, washers and spring nuts.
- Angle brackets - mild steel, hot dip galvanised BS EN ISO 1461:2009
